Xcarbody

**Stress-free**  
through the winter  
in your campervan

Feel free!

## The doors are open, but it's warm inside!

Winter without stress in your campervan

Never freeze again in your panel van! Finally, the wish of many off-road and campervan campers has come true. Even when the back or sliding doors are thrown wide open, it stays cosy warm inside. That is because the **BlidimaX<sup>®</sup> carbody** thermal solution for the door area effectively protects the interior of your vehicle against cold and wind in winter – without the notorious cold spot.

Strategically positioned zips ensure that you can easily enter and exit your van – and pass objects through it, as well. And the best part: The thermal effect of **BlidimaX<sup>®</sup> carbody** works just as well in summer or in particularly hot areas.

This means you can open the doors of your panel van without the interior suddenly freezing or being bowled over by penetrating heat.

## Customised by Blickdicht Manufaktur

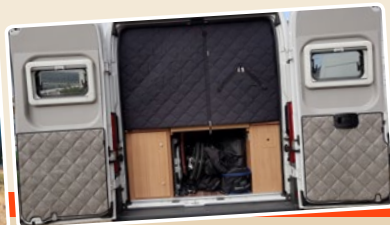

Tailored to your vehicle and your wishes

We finish **BlidimaX<sup>®</sup> carbody** by hand and made to measure. In doing so, we tailor the entire thermal system individually to your panel van and your wishes. We are happy to carry out special requests, e.g. extra openings for door windows. You will also create your personal design from a palette of over 50 combinations of colours and seams.

From measurements to curtain production, installing the zips through to final installation, your van will stay with us for about a week. Then you'll be ready for winter travel.

# BLICKDICHT Manufaktur

## Blickdicht Manufaktur

Providing optimal privacy and protection against extreme temperatures for sophisticated customers.

Blickdicht Manufaktur is a family business in Neuss, Germany. Our customers care about quality. That's why we only create individual, customised **Blidimax**® products of the highest quality. You can order thermal insulation for panel vans and pop-up roofs from us, as well as privacy screens for all campervans, caravans and off-road vehicles. It's also incredibly easy to use window screens in cars, lorries and boats. We also make products for specific purposes and special uses, customised and made to measure – whether it be for a sunroom or skylight.
